CCTV Installation

Luminous IT Solutions offers a wide range of video surveillance and cctv systems designed for outstanding performance. We work with experts in design, installation and maintainance. The most cost effective method to protect, monitor and secure your property is with a CCTV installation. Carefully designed surveillance systems can help prevent theft, vandalism and other damage at your premises.

PC Maintenance

Luminous IT Solutions prides itself in offering full service computer support that covers every conceivable problem which you may have with your computers. We can also get your computer repaired and up and running again in the shortest time possible, with the absolute minimum hassle and inconvenience. Our professionally trained technicians can perform routine maintenance on your computers, without causing any interruptions to your work.

Printer services

Our printer service & maintenance division offers wide range of service, we have certified staffs in all level of printer service, no matter its photo copier or color printer. Our trained staffs can clear all your issues and problem related to your printer by cost cutting and time saving procedure.

Networking

Luminous IT Solutions enables your business to maximize your network infrastructure investment by designing and implementing network solutions that cater for voice, video, data and storage technologies. As no network is the same, we will custom design and implement a network solution that fits your business model. Our highly qualified technicians will address these common network problems such as connectivity, availability, security and performance to give you peace of mind.

POS system

We take as much pride in the quality of our hardware as we do in our software. We source only the best quality product that will work for you time and time again to ensure that your POS system is running at it's most efficient. Our hardware consists of terminals printers, scales, scanners and more depending on your requirements. Our technical teams are made up of experienced professionals who are always available to assist with any technical problem.
